JURNAL

1. **Create Table**
   a. **Create film**

   Script:

   CREATE TABLE film (id_film NUMBER PRIMARY KEY, judul VARCHAR2(50),
   2 sinopsis VARCHAR2(500), tahun NUMBER, durasi NUMBER);

   Screenshot:

```
SQL> desc film;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 ID_FILM                                   NOT NULL NUMBER
 JUDUL                                              VARCHAR2(50)
 SINOPSIS                                           VARCHAR2(500)
 TAHUN                                              NUMBER
 DURASI                                             NUMBER
```

   b. **Create theater**

   Script:

   CREATE TABLE theater
   2 (id_theater NUMBER PRIMARY KEY,
   3 harga NUMBER,
   4 kapasitas NUMBER,
   5 kelas VARCHAR2(20));

   Screenshot:

```
SQL> desc theater;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 ID_THEATER                                NOT NULL NUMBER
 HARGA                                              NUMBER
 KAPASITAS                                          NUMBER
 KELAS                                              VARCHAR2(20)
```

   c. **Create member**

   Script:

   CREATE TABLE member
   2 (id_member NUMBER PRIMARY KEY,
   3 nama VARCHAR2(30),
   4 no_hp VARCHAR2(20),
   5 tgl_lahir DATE,
   6 email VARCHAR2(50));

   Screenshot:

```
SQL> desc member;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 ID_MEMBER                                 NOT NULL NUMBER
 NAMA                                               VARCHAR2(30)
 NO_HP                                              VARCHAR2(20)
 TGL_LAHIR                                          DATE
 EMAIL                                              VARCHAR2(50)
```

d. Create Jadwal

Script:

```
CREATE TABLE jadwal
  2  (id_jadwal NUMBER PRIMARY KEY,
  3  id_film NUMBER,
  4  id_theater NUMBER,
  5  period_start DATE,
  6  period_end DATE,
  7  FOREIGN KEY (id_film) REFERENCES film(id_film),
  8  FOREIGN KEY (id_theater) REFERENCES theater(id_theater));
```

Screenshot:

```
SQL> desc jadwal;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 ID_JADWAL                                 NOT NULL NUMBER
 ID_FILM                                            NUMBER
 ID_THEATER                                         NUMBER
 PERIOD_START                                       DATE
 PERIOD_END                                         DATE
```

e. Create Inventaris

Script:

```
CREATE TABLE inventaris
  2  (id_inventaris NUMBER PRIMARY KEY,
  3  id_theater NUMBER,
  4  nomor_kursi NUMBER,
  5  FOREIGN KEY (id_theater) REFERENCES theater(id_theater));
```

Screenshot:

```
SQL> desc inventaris;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 ID_INVENTARIS                             NOT NULL NUMBER
 ID_THEATER                                         NUMBER
 NOMOR_KURSI                                        NUMBER
```

f. Create transaksi

Script:

```
CREATE TABLE transaksi
```

```
2  (kode_pemesanan NUMBER PRIMARY KEY,
3  id_jadwal NUMBER,
4  id_member NUMBER,
5  status VARCHAR(25),
6  tanggal DATE,
7  total_harga NUMBER,
8  FOREIGN KEY (id_jadwal) REFERENCES jadwal(id_jadwal),
9  FOREIGN KEY (id_member) REFERENCES member(id_member));
```

Screenshot:

```
SQL> desc transaksi;
 Name                                      Null?    Type
 ----------------------------------------- -------- ----------------------------
 KODE_PEMESANAN                            NOT NULL NUMBER
 ID_JADWAL                                          NUMBER
 ID_MEMBER                                          NUMBER
 STATUS                                             VARCHAR2(25)
 TANGGAL                                            DATE
 TOTAL_HARGA                                        NUMBER
```

2. Insert

- **Film**

```
SQL> INSERT into film VALUES (01, 'The Walking Dead: Dead City', 'Menceritakan tentang wabah zombie yang sudah menyebar di seluruh dunia', 2023, 90);

1 row created.

SQL> INSERT into film VALUES (01, 'Dramok Teror Ambarukmo' , 2023, 90);
INSERT into film VALUES (01, 'Dramok Teror Ambarukmo' , 2023, 90)
            *
ERROR at line 1:
ORA-00947: not enough values

SQL> INSERT into film VALUES (02, 'Dramok Teror Ambarukmo' ,'Menceritakan legenda ambarukmo yang suka meneror warga Rongawi Selatan', 2026, 120);

1 row created.

SQL> INSERT into film VALUES (03, 'The Batman', 'Kisah Bruce Wayne membasmi kejahatan dalam kegelapan', 2022, 100);

1 row created.

SQL> select * from film;
